

## *Jonn Serrie*

<http://vipinfo.com/jonn/>

Jonn Serrie is at the forefront of the electronic music industry. His visionary compositional skills have revolutionized today's contemporary electronic music.

Along with his extensive portfolio of recordings Serrie's list of achievements and contributions is both diverse and esteemed. He was commissioned to compose the music for the world's first interactive planetarium production with *Star Wars* creator **George Lucas** and the *Hayden Planetarium* in New York City. His music has been heard in literally hundreds of theatres worldwide including England, Germany, Sweden, Italy, Japan, China, Canada, South America, Australia and many others. He composed the score for "**Galaxies Across Space And Time**", an *IMAX* and *Space Telescope Science Institute* feature film about the discovery of Deep Field galaxies beyond the known universe. The film won first place in the *Large Format Film Festival* in Los Angeles. Jonn's music is also featured in the planetarium theatre on the *Queen Mary 2*, the world's most advanced luxury cruise ship.

His music is used in *World's Fair* exhibits around the globe, including the Futures Pavilion in Seville that won first place for the best science exhibit. Jonn contributed music to *PBS* ("John Glenn; an American Hero"), the *Discovery Channel* ("Wings" series), the *Weather Channel*, the *U.S. Navy Blue Angels*, custom music for aviation's top female aerobatic champion *Patty Wagstaff*, performance music for legendary pilot *Pat Epps* and a unique presentation of educational narrative and live music with famed *NASA* astronaut *Story Musgrave* called "Space Stories". Jonn is an FAA licensed pilot with advanced instrument and commercial ratings and flies for the *U.S. Air Force Auxiliary* as a search and rescue mission pilot.

He has composed music for the hit Hollywood film "**What The Bleep Do We Know?**" starring Academy Award winner *Marlee Matlin* and projects on wellness with *Bernie Segal*.

Jonn was chosen to compose the music for *Cirque De La Symphonia's* new corporate show, "**Cirque Universe**" which features an interactive and live electronic music performance with world renown *Cirque* artists.

Jonn performed at the anniversary celebration of *Apollo 11* televised worldwide from Cape Canaveral, as well as premier performances at the *Ansari X-Prize* and *International Space Development Consortium* events in St. Louis and Washington, DC. He has performed before world leaders at the *Carter Center* in Atlanta and major corporate, astronomy and New Thought events around the country. Jonn also sponsors the *Galaxy Music Scholarship*, a \$1,000 prize awarded to graduating high school music students. Jonn's music is utilized in the medical community for *sleep research* and *music therapy* programs for autistic children.

The music of Jonn Serrie embraces the expansiveness of space with the intelligent use of melody. He has made space understandable and the soul accessible.

**"My music exists to help us explore a sense of ourselves and our place in the Universe"**
